

## Dore village parking

### Additional submission received at public meeting

18 January 2012

#### Problem

Dore village has no public parking facilities. Typically roads are narrow and the village has shops, houses, churches, pubs and a bus terminus all competing for frontage. Limited open areas are mostly privately owned. Demand for parking space arises from:

- house owners
- people visiting shops
- people catching bus into town
- people working in village.

#### Solutions

- Establish public car parks anywhere within say 0.5 mi of village centre. Limit parking in village streets (say 30 mins).
- Move bus terminus (with adjacent parking) to outskirts of village but retain route through village.
